

Android/iOS Software Engineer

March 4, 2020

Intelligent Product Solutions (<http://intelligentproduct.solutions>) is a leading product development professional services company. The leadership and senior engineering team are deeply talented with unparalleled experience in industry and consulting services. Our client base includes some very well-known Fortune 100 brands as well as budding startups. Because of our explosive growth, we are seeking talented individuals to join our team.

Our company is seeking highly motivated application software engineers who would enjoy working on diverse and challenging products. We are looking for individuals who have high creativity balanced with strong engineering fundamentals. We seek developers experienced in multiple environments with expertise in a diverse set of programming languages and technologies.

The ability to work with cross-functional engineering teams is required. We seek high-energy individuals who are self-directed, take responsibility and can manage their individual work; satisfying customers who expect on time and budget delivery that meets or exceeds requirements. Outstanding communication and interpersonal skills are required.

Requirements

- Bachelor's in Computer Science or Computer Engineering
- Minimum 5 years' experience as a software engineer
- Experience developing applications and modules from scratch
- Excellent written and verbal communications skills

Required Skills

- **iOS:**
 - Experience in Objective-C and Swift development
 - Experience working with Core Data, Delegates, Protocols, etc.
 - Experience working with Story Boards
- **Android:**
 - Strong knowledge of the Android SDK, working with different versions of Android and how to deal with different screen sizes
 - Intimate understanding of the Activity Lifecycle
 - Experience with offline storage, threading, asynchronous tasks, and performance tuning
 - Understanding of Material Design Guidelines
- **General:**
 - Git/BitBucket
 - Experience with push notifications
 - Familiarity with RESTful APIs to connect applications to back-end services
 - Experience with automated testing (unit and/or functional), automated deployment as well as continuous integration

Preferred Skills

- Experience with TestFlight, App store and Google Play Store deployment
- Experience with cloud messaging APIs (such as Amazon SNS)
- Understanding of APNS certificates well enough to explain to non-technical personnel

Nice to Have Skills

- Some experience with backend server API development (regardless of language)
- Working in an Agile environment
- Some experience with Kotlin
