

Industrial Designer I

March 5, 2020

Intelligent Product Solutions (<https://intelligentproduct.solutions>) is a leading product development professional services company based an hour outside of NYC. The leadership and senior engineering team are deeply talented with unparalleled experience in industry and consulting services. Our client base includes some very well-known Fortune 100 brands as well as budding startups. Because of our explosive growth, we are seeking talented individuals to join our team.

Our company is seeking a highly motivated, detail-oriented individual who enjoys working on diverse and challenging projects. We're led by our values of honest, collaborative problem-solving and take both our work and our fun seriously. We are looking for individuals who have high creativity balanced with strong communication and reporting skills.

The ability to work with cross-functional engineering teams is required. We seek high-energy individuals who are self-directed, take responsibility and can manage their individual work; satisfying customers who expect on time and budget delivery that meets or exceeds requirements. Outstanding communication and interpersonal skills are required.

Requirements

- Bachelor's degree in Industrial Design or other related field
- Minimum 1-2 years' experience
- Work will be performed out of our headquarters in Hauppauge, NY
- Strong proficiency in CAD programs(Alias, Solidworks, Pro-e), Adobe suite and Keyshot
- Portfolio of past work

Responsibilities

- Deliver design at a high quality
- Express ideas and concepts through visual/verbal communication skills by contributing to ideation as well as accurate implementation of ideas.
- Communicate and present your ideas through sketches, prototypes, and 2D/3D renderings, with attention to detail.
- Build CMF(color, material, finish) documents
- Perform user research and competitive analysis to inform feature development and improve existing features and user flows to achieve our customers business and brand goals.
- The ability to develop a UI design to create, communicate and present interactive wireframes/prototypes based on requirements
- Support several projects at different levels of engagement.
