

Linux Applications Engineer

March 27, 2020

Intelligent Product Solutions (<https://intelligentproduct.solutions>) is a leading product development professional services company based an hour outside of NYC. The leadership and senior engineering team are deeply talented with unparalleled experience in industry and consulting services. Our client base includes some very well-known Fortune 100 brands as well as budding startups. Because of our explosive growth, we are seeking talented individuals to join our team.

Our company is seeking highly motivated application software engineers who enjoy working on diverse and challenging products. We are looking for individuals who have high creativity balanced with strong engineering fundamentals. Our developers are experienced in multiple environments with expertise in a diverse set of programming languages and technologies.

The ability to work with cross-functional engineering teams is required. We seek high-energy individuals who are self-directed, take responsibility and can manage their individual work; satisfying customers who expect on-time and on-budget delivery that meets or exceeds requirements. Outstanding communication and interpersonal skills are required.
